## INCREASE THE POWER OF YOUR CMMS

EDICAD  
SMART

APCSmart is the 2D/3D BIM graphics solution connected to your CMMS for the display and edition of plans and digital mock-ups in real-time. Asset management and automation of your maintenance operations within your facilities has never been so easy, complete and efficient.

*Thanks to the synchronization of APCSsmart and your CMMS, any modification made in one is automatically and instantly visible in the other. The precision and geolocation of the data therefore transmitted in real time is 100% guaranteed.*

### A solution dedicated to your specific activity sector

APCSmart is the solution dedicated to asset management and the automation of your maintenance operations for the sites you are in charge of:

- **Tertiary**
- **Territorial authorities:** Regional councils, Departmental Councils, city halls
- **Health :** hospitals, clinics
- **Civil and military security**
- **Public services**
- **Social and private housing**
- **Shops and leisure activities**
- **Transport**
- **Industries**

### Direct link between APCSsmart and your CMMS

**1** - Adding an alert or data, modifying or deleting an item in APCSsmart are instantly visible in your CMMS.  
**2** - Any alert reported and filled in your CMMS is instantly transmitted to APCSsmart that locates it in the plan and/or the 3D model.  
In both cases, no file import or export is necessary.

### The complete inventory of your built assets

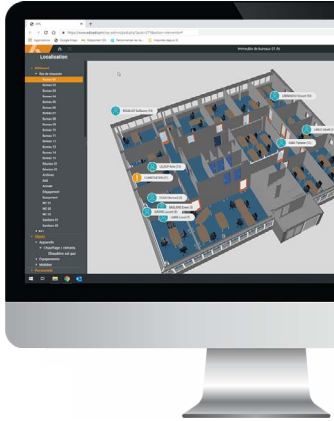

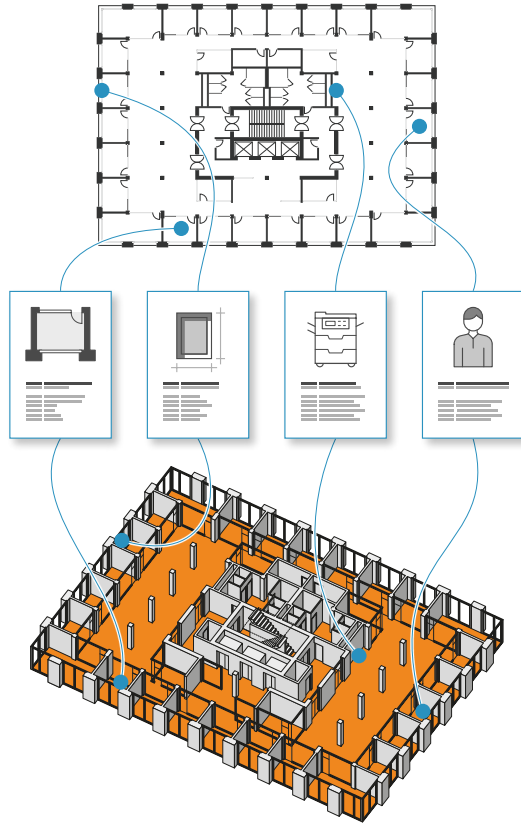

APCSsmart lists all your sites, allows you to display their characteristics as well as their corresponding 2D plans and 3D models in the BIM environment. Thanks to APCSsmart, the assets you manage are permanently available for consultation in the form of an unlimited tree structure in levels and depth:

- **Sites,**
  - the various **buildings** located there,
  - the **floors** that constitute them,
  - **housing** or **services** that divide them,
  - the **rooms** that distribute them,
  - the **equipment** they have: radiators, sinks, air conditioners, light fittings...
- **appliances** (computers, copiers, printers...) and **furniture,**
  - the allocated **annex spaces:** cellars, attics, parking spaces...

More information on  
[www.edicadsmart.fr](http://www.edicadsmart.fr)

- the **users** who use them : renters, employees...

#### COMPATIBLE BROWSERS

- Mozilla Firefox, Google Chrome, Microsoft Edge and Apple Safari

#### MOBILE DEVICES

- Operating Systems: iOS and Android

#### PC (minimum system requirements)

- Operating Systems (64 bits): Window, MacOS, Linux
- Intel Core i7 (3.00 GHz) or equivalent
- SSD 256 Go
- 16 Gb for RAM
- 1920x1080 resolution, 32 bits true colors
- NVIDIA GeForce RTX 2070 card or equivalent with 8 Gb dedicated

your CMMS is then expressed graphically on the APCCSmart screen: an intervention to be carried out is automatically geolocated in the site.

#### Control of your maintenance plans

APCCSmart displays your forecasted maintenance plans on the digital mock-up.

#### All data on the same plan

Thanks to the layers displaying and its filtering system, APCCSmart allows to group all the necessary data for the management of a site on the same plan or the same 3D model in order to meet the expectations of all the departments occupying this site:

- **Archives,**
- **Computer technology,**
- **General resources,**
- **Human Resources,**
- **Security,**
- **Communication,**
- etc.

#### Import/export

APCCSmart can import and export 2D/3D files in DXF, DWG, SKP, PDF, and IFC formats.

#### Optimization of your interventions

All interventions in progress or alerts on your computer are displayed in the digital mock-up, on your computer and on the mobile screens of your collaborators or maintenance technicians. Thanks to the GPS localization of events, the teams on site can easily see them, draw up a report and intervene if necessary.

#### Permanent control of your assets

APCCSmart displays your assets on 2D/3D drawings in the BIM environment with the information essential to your activity. The data transmitted by

#### SaaS or On-Premise: choose your solution

Depending on your company's infrastructure and security policy, you can choose the *SaaS*\* solution allowing you to access the software via an Internet connection through a simple subscription to EDICADSmart; or *On-Premise* for an application whose security is then managed internally by your teams.

In both cases, software updates are automatically performed by EDICADSmart. You therefore benefit, directly, from the latest improvements made to it.

(\* SaaS : "software as a service"

### APCBuilding and APCSurvey, APCSmart add-on modules
